

Features (ClinicOCR)

- Convert handwritten prescriptions into clean, structured digital records in seconds.
- Improve OCR results using AI to make difficult handwriting easier to understand.
- Automatically identify medicines, dosages, frequencies, and treatment instructions.
- Organize every prescription under the right patient for easy access and management.
- Review and edit AI-generated content before saving to ensure complete accuracy.
- Search patients and their prescription history quickly whenever you need it.
- Store the original prescription image alongside the extracted text and AI summary.
- Reduce paperwork and spend more time with patients through a faster digital workflow.
